

Elusiyan Mathew Eluwole

Software Developer

431-388-4420 | elusiyan.m.eluwole@gmail.com | Winnipeg, MB | [Portfolio](#) | [LinkedIn](#)

PROFILE

Software Developer with enterprise experience at Canada Life, contributing to the development, testing, maintenance, and support of Java Spring Boot applications. Experienced in full-stack development, including backend services using Java, Spring Boot, REST APIs, and SQL, as well as frontend development using React and TypeScript. Proven ability to collaborate with developers, QA analysts, and business stakeholders in Agile environments.

Strong foundation in software engineering, problem-solving, automation, and continuous learning. Known for being adaptable, eager to learn, and interested in AI, innovation, and emerging technologies that improve business outcomes.

PROFESSIONAL EXPERIENCE

Canada Life — Software Developer
Data Automation & Platform Engineering

May 2026 – August 2026
Winnipeg, MB

- Develop, enhance, test, and maintain enterprise applications using Java and Spring Boot.
- Build and support RESTful APIs and backend services that integrate with business-critical systems.
- Participate in Agile Scrum ceremonies including sprint planning, backlog refinement, daily stand-ups, retrospectives, and code reviews.

- Troubleshoot application defects and production issues, performing root cause analysis to support system stability.
- Collaborate with software developers, QA analysts, and business stakeholders to deliver business requirements.
- Support application deployments, post-release validation, and production maintenance activities.
- Perform unit testing and support integration and system testing activities.
- Develop and maintain Java Spring Boot applications using IntelliJ IDEA, following enterprise coding standards and best practices.
- Work with SQL databases to investigate issues, validate data, and support application functionality.
- Contribute to technical documentation and knowledge sharing across development teams.
- Assist in modernizing and maintaining multiple enterprise applications supporting Canada Life business operations.

Ready Made Solution Inc
Front-End Developer

Apr 2025 – Dec 2025
Winnipeg, MB

- Participated in design, development, testing, and maintenance of client-facing software applications.
- Developed reusable UI components using React and TypeScript.
- Investigated software defects, performed testing, and implemented performance and usability improvements.
- Participated in Agile development processes and sprint-based delivery cycles.

Skybridge Americas Inc.
Information Technology Help Desk Technician

Jan 2026 – April 2026
Remote (Canada & U.S.)

- Provided technical support for software, hardware, and system-related issues.
- Performed root-cause analysis and documented incidents.
- Collaborated with technical teams to resolve complex issues.
- Documented incidents and resolutions within ticketing systems.
- Assisted users with application access, system configuration, and technical guidance.
